

## Case Study: Residential

---

**Client:** Private client

**Location:** Hill Brow, Hampshire

### Summary:

Nestled amongst mature trees on a 5 acre landscape, the 4 bedroom dwelling has been carefully positioned and sympathetically constructed to harmonise with its surroundings. Constructed from SIPs panel technology, the fully-insulated and water tight frame was erected in just 10 days. Stroma Building Control (formerly BBS Building Control) provided the Building Control on the conversion and extension to the original property.
